We will use prediction of excessively high temperatures to cancel the TT events at two intervals before the event start time. We will cancel based on forecasting to give riders plenty of cancellation notice. At approximately 8 pm the night before the TT, we will cancel the event if any of the forecasts call for temperatures two degrees over the course limit. Before 10 am on the day of the TT, we will cancel the event if any forecast calls for a temperature over the course limit.

Process:

- Use NOAA point forecast web site and weather.com (The Weather Channel) to check multiple forecasts.
- Website check time: 8 pm the night before. If any forecast predicts a temp two degrees at or over the limit during the ride window, we cancel the ride. (**8pm: cancel if forecast >= limit + 2**)
- Website check time: before 10 am on the ride day. If any forecast predicts a temp at or over the limit during the ride window, we cancel the ride. (**10 am: cancel if forecast >= limit**)
- Cancellation will be broadcast via Email and Facebook.
